

INDIANA SUMMER RESORTS

WINONA LAKE.

Special to the Indianapolis Journal. WARSAW, Ind., Aug. 15 .- The largest week in point of attendance in the history of Winona has just closed, from 6,000 to 10,000 persons being on the grounds at Winona Lake every day during the week to hear Ceratore and his Italian band of fifty-five pieces. Excursions have been conducted from all over the northern half of Indiana, and all of the crowds which have visited Winona have been highly pleased with the entertainments and the treatment received while on the grounds. The Auditorium, with a seating capacity of over 4,000, has been crowded nine times this week to hear the Italian band and its wonderful leader, and thousands have been unable to secure seats for the concerts. Baseball has been a daily feature at Winona during the week, and some very pretty contests have been witnessed. This week's programme closed the season of 1903 at Winona as far as the programme is concerned, although next week there will probably be more persons on the grounds for the week than at any other time for the season, the Winona National Bible conference commencing on Sunday. This is the ninth annual conference conducted at Winona under the direction of Rev. J. Wilbur Chapman, and in the past eight years the attendance has grown from thirty-five to about 8,000. This year it is expected that the attendance will reach almost 10,000. It is quite a question to care for the crowds. If necessary the homes of the people of Warsaw will be thrown open to the visitors, and all can secure good accommodations. Clara Morris, the worldrenowned retired actress, was also a special feature at Winona on Wednesday evening, and lectured to about 4,000 persons in the Auditorium on "A Peep Behind the The Kosciusko County Teachers' Insti-

tute, under the direction of County Superintendent Edson B. Sarbar, has been in progress at Winona during the week, the being held in the chapel of the Inn. Many prominent educators have been present and spoke at the meetings, and the sessions have all been very interesting and

GARLAND DELLS.

Anderson, William Houston, Mt. Gilead.

Special to the Indianapolis Journal. WAVELAND, Ind., Aug. 15 .- Last Sunday proved a record breaker for crowds at the Dells. From early morning until far into the afternoon people came in throngs to enjoy a day's outing. For a drink of clear, sparkling minerals waters for which the resort is noted, people will come for miles and after a climb over the hills and a boat ride on the river one feels that the day has been well spent. The beautiful grounds are crowded with tents of campers from every point of the compass and one is led to imagine at a first glance that he is entering a white tented city. As the shades of evening begin to fall and lights begin to twinkle in the various camps, strains of imagines a scene from fairyland

WAWASEE.

Special to the Indianapolis Journal. WAWASEE, Ind., Aug. 15 .- The history and the naming of Lake Wawasee is perhaps the quaintest of all the numerou lakes in Indiana. It was long, long ago that the Pottawatomies, a very thriving tribe of Indians, first built their wigwams on the shores of Turkey lake because, after wandering all around what is now northern Indiana, they found this lake to be the largest and the land surrounding best for their manner of cultivation. Perhaps they did not care for the scenery, since they were red men, nevertheless they certainly chose a most beautiful spot for their home. The name of Wawasee was given to the lake by the Indians, who, in their imagination, saw the lake with its irregular banks in the shape of a turkey.

It was in the early '40's that the first settlement of white men dotted the shores the week with his parents at the Stott of Wawasee and the name of Turkey lake (the English of Wawasee), was given to this small body of water. In the course of a few months or probably a year several hewn log cabins were built, and as the small family remained on the reservation at | coming adepts in swimming. The fishing red men and their wigwams were forgotten, nothing but their burial grounds and traditions, with which we are all familiar, remaining. The white settiers, after building their cabins, began the cultivation of the land, and as the people prospered and advanced, more modern dwellings were erected until at present the shore is dotted with hotels and summer cottages belonging to the city people, who are glad to get summer outing on the peaceful banks of Wawasee.

At present there are five hotels on the east side. Mineral Park at the east end and Vawter Park and Lakeview on the south Around all these places are found the beautiful cottages, where one is satisfied the whole summer lounging on the wide verandas, strolling along the beach or rowing on the water's glassy surface. Probably some people after summer on the lake, never thinking of its history unless they stop at "Butter milk Point," where there is a quaint old spring house, or at Pickwick Park, where now stands on the point "Grandpa" Lamb's cabin. Although it is whitewashed on the outside and has modern furnishings, it takes one back many years, if, when passing, they see "Grandpa"-as he is known

pipe or talking to the swarm of children that hover around him always ready to hear one of his stories. Mr. Mordson, one of the oldest residents around the lake, sold his island of about forty-seven acres at the east end of the lake and left this week for California. The ground will be surveyed and laid out in lots. The island, known as Morrison's island, will, it is thought, make one of the most beautiful building points on the lake. The Young People's Alliance are holding their twelfth annual convention at Oakwood park this week. The crowd is increasing every day, and the meeting is considered the best of its kind ever held at Oakwood An excursion of 800 people from Sherwood and Tiffin, O., spent Thursday at the lake, enjoying a trip around the lake on one the numereuos steamers and a picnic din

BLOOMINGDALE GLENS.

Special to the Indianapolis Journal.

BLOOMINGDALE, Ind., Aug. 15 .- The owner of this popular resort, a man in his sixty-sixth year, is little known to visitors. About a mile from the camp grounds the fine old Lusk homestead still stands, a substantial brick building, with massive stone foundation, as strong apparently as when placed there more than half a century ago. Here Mr. John Lusk, the owner of Bloomingdale Glens and adjacent land, aggregating nearly 1,200 acres, lives the life of a recluse. Since his mother's death, twenty years ago, he has lived alone, no relative or servant assisting in the care of the old family mansion. Mr. Lusk has many interesting reminiscences of places and happenings along Sugar creek. Early in the civil war target practice was carried on near Turkey run by the boys preparing to join the ranks. Mr. Lusk tells of a tree used as a target which came to contain many bullets fired from the army pistols. Later, country boys chipped out blocks of wood from this tree to get the bullets. The lead was remolded and served as bullets for smaller fire arms, used by the boys in their hunts

along Sugar creek. The bathing season is now at its beight number of Pottawatomies slowly decreased | On warm afternoons scores of bathers have the wigwams disappeared until but a jolly times in Sugar creek. Many are be most by the campers. Last Sunday was the biggest day of this season. The Kingman Band gave a concert in the afterno and hundreds of visitors from ne towns drove out to the Glens to spend the day. The rain on Saturday settled the dust and made driving delightful. Mr. Gilbert, of Dana, came over in his auto mobile and spent the day here, returning

home by moonlight. The Rock Run Coal Company of Mecca has begun drilling for coal on land ab two miles southwest of the Glens, company has leased 700 acres along Su creek, and if the test shows as rich a deposit of coal as is believed to lie be surface here extensive mines will opened and a brinch line will be built from the C., H. & D. tracks to the mines. CAMPERS AND VISITORS.

she is so she has numerous admirers. In fact, this young lady has so many worshipers at her shrine that she frequently has to give some of them the "mitten." However, there is always one dearer than all the rest. And so it was with this girl. The young man whose picture might be found framed on the mantel piece of her room was a handsome youth who came from an old Virginia family with a family tree like a forest monarch. He was a type of Southern gentleman, and the young lady who figures in this story "just doted" on him. She had a weakness anyway for the atmosphere of the South and he embodied the chivalry and honor she had learned to admire in her romances. This young man lives out of town, but whenever he is in the city, and the young lady has no previous engagement, there is a dinner at a cafe and a pleasant evening either at the

She would leave a note at her boarding house for the elderly man, saying that she had been unexpectedly called to see a sick friend and could not attend the theater. That would be easy, for he was such a considerate man and would

With a light heart the young lady resumed her labors and all the while was inwardly congratulating herself on the quickness of her brain and the alertness with which she had conquered the situation. These are the qualities he has most needed the greater aprt of the time since. And fortunately he has never lacked them. But a wonderful change has taken place, and farming, like every other trade, business and profession, is affected by it. A comparatively small share of the good farming land of the country remains unoccupied. The farmer's main problem is no longer how to protect his land and livestock from the incursions of wild men and wild animals, or how to get enough money to buy the adjoining "forty" or "eighty." His great problem now is, how to increase the productiveness and value of the land and stock he has. He has never had much use for science before.
